Web3 and Blockchain Development. Web3 and Blockchain Developer with hands-on experience in smart contract development (Solidity, Rust), decentralized storage (CESS), and cybersecurity fundamentals. Strong background in network infrastructure, monitoring systems (Zabbix, Grafana), and secure data handling. Detailoriented, documentation-driven, and focused on scalable, privacy-first architectures. Open to remote opportunities in blockchain engineering, dApps, and decentralized infrastructure

SKILLS

- Smart Contract Development: Solidity, Rust.
- Decentralized Applications: dApps, Web3.js, Ethers.js, WASM, EVM.
- Frontend: React, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+).
- Security & Infrastructure: Linux, MySQL, Python, Cybersecurity, Decentralized Identity.
- Monitoring & Networking: Zabbix, Grafana, Centreon, Network Protocols.

EDUCATION

- Network Engineering. University of Brasília. Expected Graduation: 2026

CERTIFICATIONS

- Google Cybersecurity Professional Certificate: Linux, Python, MySQL labs. OSINT, SIEMs, IDS, IPS, EDR tools.
- Decentralized Data Infrastructure with CESS: Focused on real-world Web3 infrastructure challenges, combining blockchain, data privacy, and scalable storage solutions.
- CompTIA Security+ (SY0-701): CompTIA Security+ validates core cybersecurity skills in risk management, threat mitigation, and securing network environments
- Projeto ILIADA Blockchain introduction, Web3 and Rollups in progress: This course covers end-to-end dApp development, from Web3 fundamentals and smart contracts to building a final project with the Cartesi Rollups SDK.

LANGUAGES

- Portuguese: Native
- English: Fluent
- Spanish: Intermediate

WORK EXPERIENCE

- **ANATEL** | Internship: May 2025 – Present. Managed logs and configured monitoring dashboards using Zabbix and Grafana. Supported network coordination, data sharing, and the resolution of regional network demands.
 - **TELEBRAS** | Telecommunications Management Specialist. Internship: July 2022 – July 2024. Managed and configured network monitoring systems, including Centreon, Cacti, Zabbix, and Grafana. Oversaw system log management to ensure network health and performance.
-
